

# Excel Report Card

## 1<sup>st</sup> Semester 2022-2023

We are implementing a new rubric for Excel students. Students will now be assessed in four different categories in Excel. Attached to this letter is the rubric with detailed information about each category. Higher-Order Thinking Skills and Written or Project-Based Expression of Understanding have only been introduced and not assessed. Part of Excel is helping the learner develop their creativity in a God-honoring way. At this time, no one has scored in the advanced category as these benchmarks have just been introduced. This is meant to see a little glance into their time in Excel, how they are doing, and how they can continue to shine to give God all the glory.

Topics covered so far:

2<sup>nd</sup> grade - Depth and Complexity introduction using “Charlotte’s Web”, Perplexors, Sudoku, Analogies introduction, Inquiry-based projects and Design challenges

3<sup>rd</sup> grade – Depth and complexity introduction, Socratic Seminar, Analogies introduction, Perplexors, Sudoku, Logic puzzles, Inquiry-based projects and Design challenges
